ACCREDITATION & SCOPE

Accreditation & Scope

Skyeblanc operates as an accredited non-key location within the applicable UAF-accredited management-system certification framework. Certification is provided only within the authorised scope and subject to the applicable accreditation requirements.

Accreditor · UAF

Operating standard · ISO/IEC 17021-1

Status · Accredited within authorised scope

WHAT IT MEANS

Accredited certification, within an authorised scope

Skyeblanc Certification is an accredited management-system certification operation.

Skyeblanc operates as an **accredited non-key location** within the applicable **United Accreditation Foundation (UAF)** accreditation framework. Certification activities are conducted within the authorised scope and in accordance with the applicable ISO/IEC 17021-1, scheme-specific and accreditation requirements.

Skyeblanc conducts audits and certification activities through competent and impartial personnel. Following completion of the required audit activities, an authorised Skyeblanc certification decision-maker reviews the audit evidence and applicable certification requirements and makes the certification decision.

Where certification is approved within the authorised scope, the resulting certificate is an accredited certification issued under the applicable accredited certification framework.

Accreditation does not extend beyond the approved scope. The applicable certification standard, scope, sites and certificate status are stated on the certificate and can be independently verified through the public certificate register.

CURRENT STATUS

● **Accredited within authorised scope**

Skyeblanc operates as an accredited non-key location within the applicable UAF-accredited certification framework. Certification is provided only within the authorised scope and subject to the applicable accreditation requirements.

THE CHAIN OF TRUST

How recognition flows

Each link is independent of the next — which is exactly why the chain holds.

UAF

The accreditation body assesses and accredits us against ISO/IEC 17021-1.

Skyeblanc Certification

Accredited to audit and certify within the authorised scope, and to decide independently of the audit activities evaluated.

Your certificate

Issued on the evidence, stating your certified scope, sites and standard.

Independent verification

Accredited certificates are made available through the applicable certificate-verification and accreditation databases required by the relevant accreditation framework, where applicable.

SCOPE MATRIX

Schemes, standards and scope

The management-system schemes within the authorised accreditation scope, the applicable normative standard for each, and any technical or sector scope limitation that applies.

SCHEME	APPLICABLE STANDARD	STATUS	SCOPE LIMITATION
QMS	<u>ISO 9001:2015</u> Quality Management	● Accredited	None stated
EMS	<u>ISO 14001:2015</u> Environmental Management	● Accredited	None stated
OHSMS	<u>ISO 45001:2018</u> Occupational Health & Safety	● Accredited	None stated
MDQMS	<u>ISO 13485:2016</u> Medical Devices Quality	● Accredited	None stated
ABMS	<u>ISO 37001:2016/2025</u> Anti-Bribery Management	● Accredited	None stated
ISMS	<u>ISO/IEC 27001:2022</u> Information Security	● Accredited	None stated
PIMS	<u>ISO/IEC 27701:2019</u> Privacy Information Management	● Accredited	None stated
ITSMS	<u>ISO/IEC 20000-1:2018</u> IT Service Management	● Accredited	None stated
BCMS	<u>ISO 22301:2019</u> Business Continuity	● Accredited	None stated

EOMS	<u>ISO 21001:2018</u> Educational Organisations	● Accredited	None stated
EnMS	<u>ISO 50001:2018</u> Energy Management	● Accredited	None stated
FSMS	<u>ISO 22000:2018</u> Food Safety Management	● Accredited	None stated

Certification is offered only for the schemes listed above and only within the authorised scope. Where a scheme is not within Skyeblanc's approved operational scope, that is stated in this table. The scope, standard and status applying to an individual certificate are stated on the certificate itself and can be confirmed through the public certificate register. ISO/IEC 27006-1:2024 is the applicable certification-body requirement for the ISMS scheme.

ON YOUR CERTIFICATE

Accreditation applies within the approved scope

Your certificate states the standard, scope, sites and status plainly — no customer, auditor or regulator is left guessing.

✓ Within the authorised scope

Certificates issued within Skyeblanc's authorised accreditation scope are accredited certifications under the applicable accredited certification framework, and carry the accreditation marks permitted by the applicable mark-use rules.

⊖ Outside the approved scope

Accreditation does not extend beyond the approved scope. No certificate is represented as accredited outside that scope, and any technical or sector limitation applying to a scheme is stated in the scope matrix above.

How accreditation marks may be used

Accreditation and certification marks may only be displayed in the form, and in the circumstances, permitted by the applicable mark-use rules — by Skyeblanc and by certified organisations alike. Marks are not applied to activities outside the authorised scope, and a certified organisation may not use them in a way that implies certification of a product, process or scope it does not hold. How those marks — and your own certified-status wording — may be used is set out in [Use of Marks & Certificates](#).
