

HOW VERIFICATION WORKS

Public, instant, no account

Anyone can confirm a certificate — a customer, a regulator, a partner. There is nothing to sign up for and no request to submit.

01

Search

Enter a certificate number or the organisation's name in the field above.

02

See the live status

Valid, suspended, withdrawn or expired — with the certified scope, standard and dates.

03

No login, ever

The register is public and always current. No account, no request, no waiting — check any time.

CERTIFICATE STATUSES

What a status means

Every entry in the register carries one of four live statuses.

● Valid

The certificate is in force. The management system was found to conform and remains under surveillance.

● Suspended

Temporarily not in force — pending resolution of a raised issue. It may be restored or withdrawn.

● Withdrawn

No longer in force. The certificate has been withdrawn and must not be used or referenced.

● Expired

The certification cycle ended without recertification. The organisation is no longer certified.

CERTIFIED-CLIENT DIRECTORY

Organisations we currently certify

A public sample of the register. Search any certificate above for full scope and dates.
